3 : Point of sale (POS)

Easily sell product & services and receive payments. Point of sale supports barcode items search, Image display of items or Item listing on the table. Point of Sale allows you receive payment from multiple payment methods, hold orders, record credit sale/loan.

4: Inventory Management

Powerful tool to easily manage and organise products (Inventory) and services of the your organization. Easily sell product/services through our easy to use Point of Sale.

5: Employee and Payroll

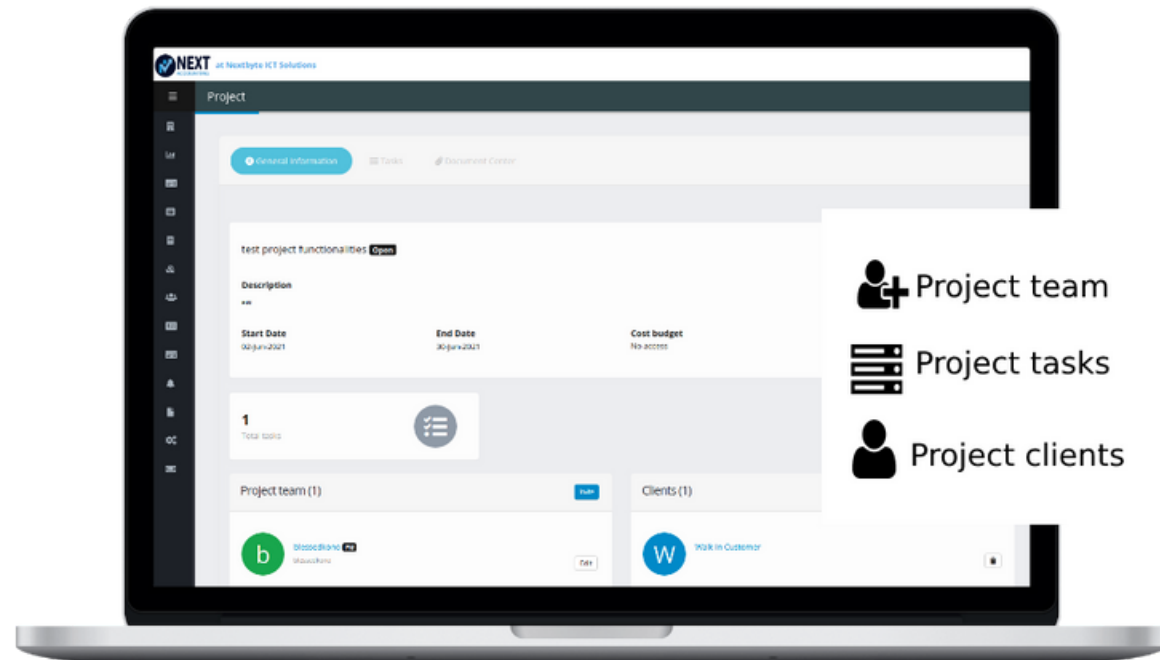

Manage your staff information including their general information, salary, allowance, deductions and loans, staff leaves contracts and other documents

Manual payroll processing can cost a lot of resources including Human and Time resource to handle the task but it was not meant to be that way. Our powerful payroll management module will automates all time-consuming tasks and makes it convenient than ever to run your business. Always meet the deadlines for payroll returns i.e. TRA PAYE, TRA SDL, WCF, NSSF and others Taxes

6:Manage Project

Track clients' projects and their related sales and expenses. Easily compare expenditure to cost budget to see profitability of each project

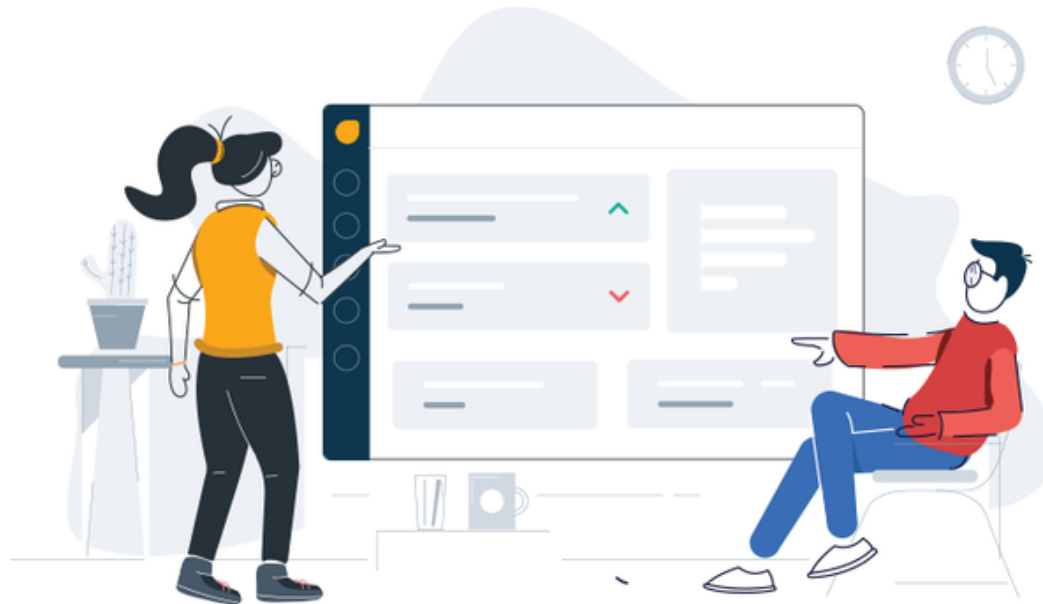

7: Financial Reports

Reports in NextAccounting are simple for you to understand but powerful enough for your accountants to complete their tasks with ease. Handful insights on progress of your business

8: Accounting

Automatic double-entry accounting on each business process with check and balances to ensure accuracy and compliance, while financial info helps you make smart business decisions and working with your accountant even easier

HOW SECURE IS YOUR DATA?

SECRET USER LOGIN CREDENTIALS

Every user is assigned a username and password that is unique across all users. Without these login credentials nobody can access your data

DATA ENCRYPTION

A technique that has been used from time immemorial to make otherwise comprehensible data incomprehensible. Should the data fall to the wrong hands while encrypted then the recipient has no way of making sense of the data.

DATA BACKUPS & REDUNDANCY

These are done regularly and ensure that our services remain uninterrupted in case some server's malfunctions.

HOW TO GET STARTED

Since NEXTBYTE's ACCOUNTING SOFTWARE is an online service, your organization will not invest even a cent on infrastructure. We shall take care of everything from server management and maintenance to data backup.

To get started with the service, all you will need are the contacts: names and phone numbers of the people that you wish to be communicating with and internet access.
